

*Custom Designed Grain and Bulk Material Handling Products*

# **BASEMENT INSERT RECEIVING PIT**

# BASEMENT INSERT RECEIVING PIT

*All systems can be custom designed to fit the requirements of your specific facility.*

## RUGGED, WELL THOUGHT OUT DESIGN WILL RESULT IN YEARS OF DEPENDABLE SERVICE

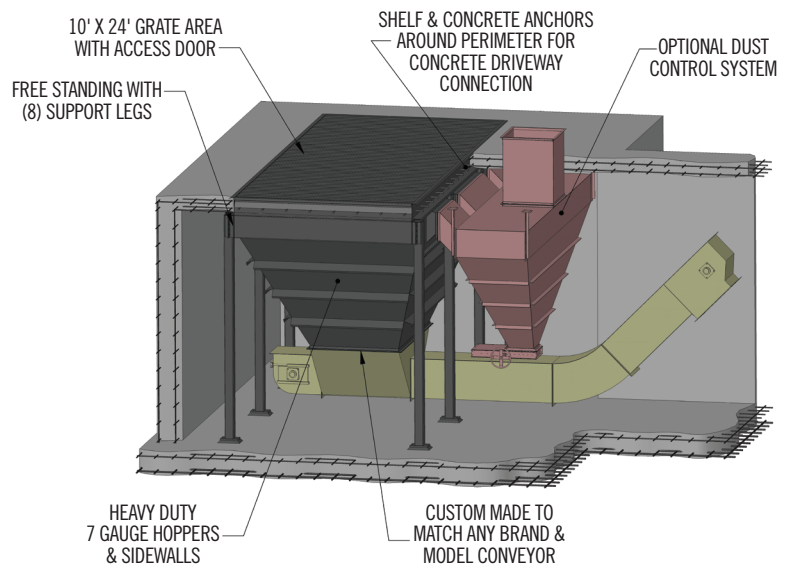

The Lowry Basement Insert is a good solution for large-volume or commercial operations, and when used in conjunction with a conveyor system, a 1,000 bushel or larger pit can be unloaded considerably faster than a conventional pit, and with less potential damage to grain (an important factor when working with seed-quality grains). The open basement setup allows for easy access to the conveyor for maintenance.

### Outstanding Features:

- ◆ One piece welded construction with drive-over full top grate
- ◆ Capacity and efficiency ideal for commercial sites
- ◆ Free standing support system, connect to conveyor inlet
- ◆ Dust control system includes suspended sub-grate baffles, self-cleaning air passages and dust gathering hopper
- ◆ Heavy 7 gauge hopper and sidewall construction
- ◆ Sizes available up to 12' X 27'
- ◆ Customized to site application
- ◆ Auto CAD drawings of customized basement insert configuration
- ◆ Delivery available for transporting pit to site

### STANDARD FEATURES & OPTIONS 1,000 BUSHEL BASEMENT INSERT WITH DUST COLLECTION
